Cost \$495.00

Should you require special accommodations due to a disability, please notify our office ten days prior to the event.

The Current Good Manufacturing Practice, Hazard Analysis, and Risk-based Preventive Controls for Animal Food regulation (referred to as the Preventive Controls for Animal Food regulation) is intended to ensure safe manufacturing/processing, packing, and holding of feed products for animal consumption in the United States. The regulation requires that certain activities must be completed by a "preventive controls qualified individual" (PCQI) who has "successfully completed training in the development and application of risk-based preventive controls or is otherwise qualified through job experience to develop and apply a food safety system." This course developed by the FSPCA is the "standardized curriculum" recognized by FDA; successfully completing this course is one way to meet the requirements for a PCQI.

For questions regarding registration, please contact Frances Seel at flongin@clemson.edu, or 864-646-2166. For questions or additional information about the course, contact Dr. Kimberly Baker at kabaker@clemson.edu.
